

# SECURITY

## PILOT SPECIALTY COURSE SERIES

### SUMMARY

**Covers aviation security issues, including both ground and flight operations. The course reviews threats and mitigation, including aviation security screening and considerations for controlled access areas. General issues for security checks, procedures and responsibilities are discussed. Flight operations topics include flight deck access, communication, prohibited items and emergency procedures. The course is available in two versions: Passenger / Cargo Airlines – emphasis on ground operations at passenger and cargo facilities. Cargo-only Airlines – emphasis on ground operations at cargo facilities.**
